Gait Analysis	F 117	\$ 34.00	
Custom Fitted			
Bilateral Foot Orthotics	F 350	\$ 549.00	
TOTAL			\$ 649.00

Provider Number : 2783123H

ABN : 65 068 485 719

The above table details the total cost of foot and gait analysis and provision of a customised pair of orthotics.
 The total cost to you is \$649.00
 Most patients are entitled to a rebate on all or part of this fee from your health fund.

Your out of pocket expense = \$649.00 minus the amount your health fund will refund to you.

The amount that you are able to claim back from your health fund depends upon:

- - The particular fund you are insured with
- - Your personal level of cover
- - If your cover includes orthotic cover

If you are unsure or concerned about this, it is important that you contact your health insurance provider to confirm the amount you will be covered for. Please quote the above item numbers.

You will be asked to pay the total cost (\$649.00) at the time of ordering your orthotics

It is important to understand this prior to ordering your orthotics. They will be ordered electronically, usually immediately after your gait analysis. Once ordered manufacture usually begins the same day.

Understandably, this process is difficult to reverse once initiated.

If you have any questions or concerns about this do not hesitate to ask Ben Hewitt, Justin Barich or my secretarial staff Shelley or Susan.
